

Healthcare facilities receive 150,000+ FDA alerts annually—yet only 2-5% apply to their inventory. RecallWire automatically filters noise, matches recalls to your specific devices, and guides your team through resolution with complete audit documentation. Go from 40 hours per recall to 4.

Platform Capabilities

**Real-Time Detection**

- 24/7 FDA signal monitoring
- Instant alert on relevant recalls
- Class I priority escalation
- Multi-category coverage

Continuous monitoring across all FDA categories with intelligent filtering.

**AI-Powered Matching**

- Automatic inventory cross-reference
- UDI and lot number matching
- 98% noise reduction
- Confidence scoring

Eliminates hours of manual research by auto-matching recalls to your inventory.

**Guided Resolution**

- Step-by-step workflow management
- Role-based task assignment
- Deadline tracking
- Status visibility across teams

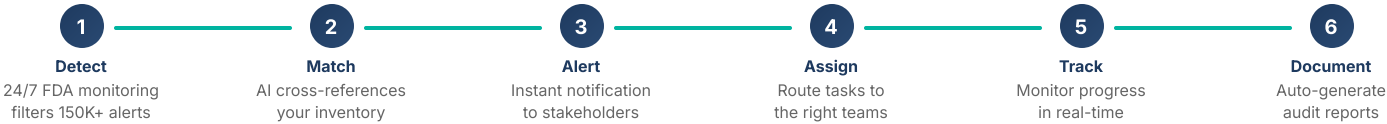

Clear ownership and accountability ensure nothing falls through the cracks.

**Audit Documentation**

- Automatic action logging
- One-click compliance reports
- Complete audit trail
- Joint Commission ready

Every action tracked, timestamped, and attributable for instant compliance.
