About Regent Surgical Health

Since 2001, Regent Surgical Health has been a leader in developing and managing successful surgery center partnerships between hospitals and physicians. We continually improve and evolve the ASC model based on changing market conditions to stay ahead of emerging trends. From this vantage point, our team has developed proprietary ASC ownership models that give both physicians and hospitals what they need to ensure long-term clinical and financial success.

Regent offers a comprehensive and competitive benefits package as one way to recognize our employee's contribution to the success of the organization and our role in helping you and your family to be healthy, feel secure and maintain a work/life balance.

Pursuant to the ADA, Regent will provide reasonable accommodation(s) to all qualified employees with known disabilities, where their disability affects the performance of their essential job functions, except where doing so would be unduly disruptive or would result in undue hardship.

We do not discriminate in practices or employment opportunities on the basis of an individual's race, color, national or ethnic origin, religion, age, sex, gender, sexual orientation, marital status, veteran status, disability, or any other prohibited category set forth in federal or state regulations.

We are an equal opportunity employer.

POSITION SUMMARY:

The Project Manager is responsible for the overall direction, management, communication, coordination of status reports, and accountability of project-oriented work efforts and success of their projects across the organization. The Project Manager will ensure projects are delivered on time, within budget, adhere to high quality standards and meet stakeholder expectations. A Project Manager is assigned to projects with multiple interdependencies and of moderate complexity, scope, risk, and impact to the business.

DUTIES/RESPONSIBILITIES:

- Plan, organize, monitor, and oversee complex projects utilizing cross functional teams to deliver defined requirements and meet company strategic objectives.
- Manage the full project life cycle including business case creation through Integration.
- Utilize corporate and industry standard project management tools and techniques to effectively manage projects.
- Maintain detailed project documentation including meeting minutes, action items, issues lists and risk management plans.
- Effectively communicate project status to all stakeholders including C-suite and center administrators.
- Coordinate cross-functional meetings with various functional areas to meet overall stakeholder expectations and company objectives.
- Regularly assist in identifying dependencies between initiatives and actions. Support key decisions and issue resolution to ensure initiatives are created and remain on track to continuously deliver desired impact.
- Capable of managing a project in one of the following functional areas: Integration, Center Applications, Data, IT Operations, and Finance.
- Work with multiple departments to document processes to analyze for process improvement opportunities.
- Perform other duties as assigned.

KNOWLEDGE AND SKILLS:

To perform this job successfully, an individual must be able to perform each essential responsibility satisfactorily. The requirements listed below are representative of the knowledge, skills and abilities required.

- Capable of managing projects in all the following functional areas:
 - Health System Integration
 - Acquisition Integration
