

Recall Tracker / SmartMatch Frequently Asked Questions (FAQs)

symplr Recall Tracker/SmartMatch software will reach end of support on December 1, 2025. Please refer to the FAQs for detailed information

Frequently Asked Questions

Q: What is Recall Tracker and SmartMatch?

A: Recall Tracker is a centralized recall management software that alerts healthcare facilities of FDA recalls and sends role-based notifications. SmartMatch automatically flags historical purchase activity about the recalled item within the facility.

Q: What is happening to Recall Tracker/SmartMatch?

A: symplr has made the strategic decision to discontinue support for Recall Tracker/SmartMatch software effective December 1, 2025. This means the solution will no longer be accessible, and all support services will end on this date.

Q: When was this decision made?

A: The decision was finalized in July 2025, with formal notice provided to all customers, ensuring more than 90 days for customers to plan and execute a transition.

Q: Why is symplr discontinuing this solution?

A: This decision aligns with symplr's strategic evolution to concentrate resources on the symplr Operations platform and more advanced solutions designed to meet the dynamic and evolving needs of modern healthcare operations. Discontinuing this solution allows symplr to invest in next-generation technology that better serves our customers' future needs.

Q: How can I export my historical data?

A: Please refer to instructions on self-service data exports by [clicking here](#).

Q: Will there be a grace period or extension after December 1, 2025?

A: No, the system will be inaccessible after this date. Plan to complete and review all data prior to this date.

Q: What happens to my data after December 1, 2025?

A: All data will be retained for a limited period of time per symplr data retention policies but will not be accessible through the solution.

Q: I'm currently a SmartMatch customer and sending purchase history to a symplr SFTP site. What action do I need to take?

A: Notify your purchasing department or responsible party to discontinue uploading data to the SFTP site.

Q: What will happen if I've made a subscription payment that extends past the end of support date?

A: A credit memo may be issued depending on your current subscription and payment status.

Q: Can I apply my credit memo toward other symplr solutions or services?

A: Yes, credit memos may be applied to past due invoices or other active products or services.

Q: What if I receive an invoice between now and the end of support date?

A: Your invoice may be prorated to cover subscription costs until December 1, 2025.

Q: Who should I contact for billing questions?

A: Email ar@symplr.com for any invoicing and payment related questions.

Q: Is symplr offering an alternative recall management solution to replace Recall Tracker/SmartMatch?

A: symplr does not have a direct replacement for this offering. We encourage you to explore the various third-party recall management solutions available in the healthcare market. For recommendations, please contact helpdesktm@symplr.com.

Decommission Procedure: Exporting Data from Recall Tracker

To ensure you retain all necessary data for audit purposes and to support a smooth transition, please follow the steps below to export your data and department contact information from Recall Tracker.

1. Export Recall Tracking Report Data

This report includes all recall activity within the system, including:

- Date of Initial Tracking
- The associated facilities
- Assigned Recall Assignees
- Recall Type and Title
- Quantities present, if applicable
- Comments tied to the recalls
- Current Status of Completion

Steps:

1. Log in to the [Recall Tracker](#) tool. Username is your e-mail.
2. Navigate to the Reports tab.
3. Select the Recall Tracking report.
4. Adjust the Start Date and End Date to cover the full range of data you wish to export.
5. Ensure all Statuses are checked.
6. Select all applicable Facilities.
7. Click Generate Report to download the Excel file containing all tracked recall data.

2. Export Departments and Contact Information (Coming Soon!)

This report includes:

- A list of **Departments** for each facility (custom or default)
- The **Recall Managers** assigned to those facilities
- The associated **Recall Assignee** contacts under each department
- The **email addresses** for each Recall Assignee

Steps:

1. Go to the Settings tab.
2. Select Department Setup.
3. Click the Excel icon located in the top-right corner of the screen.
4. This will export a spreadsheet containing all department-related data and associated contacts.

3. Video Export Walkthrough Available

A video demonstrating these steps is also available to guide you through the data export process visually. Please refer to the video attachment sent within the email notice.

Important Notes:

Ensure all data is downloaded and securely stored before the decommission date.

Any user, whether a Recall Manager or Recall Assignee, can follow these steps to download all data associated with their recalls.

If you need assistance or encounter issues during the export process, please contact your support representative helpdesktm@symplr.com for additional assistance.
