Capital Guide

Lower spending on healthcare capital & IT with more informed, data-driven decisions

ECRI's Capital Guide, the most comprehensive medical equipment procurement advisory service, generates billions in savings for hospitals and health systems grappling with the high cost of healthcare technology. As a Capital Guide member, you can request custom analyses that will help you pinpoint savings opportunities, negotiate discounts, and identify unnecessary expenditures.

Highlights

- 10 out of 10 *U.S. News Best Hospitals in the Nation* (2020-2021) use Capital Guide
- 125,000 unique items in our capital equipment pricing database of prices proposed by hospitals and health systems in the United States
- \$7 billion in capital expenses from over 3,500 providers
- Access thousands of on-demand custom comparisons

- Our independent research facility was called the “The country’s most respected laboratory for testing medical products” by *The New York Times*
- Access the largest database of medical equipment with comparative data
- Vital hazard and recall information from the largest problem reporting network
- Over 100 in-depth comparative product evaluations complete with product ratings are published each year to inform your purchasing decisions

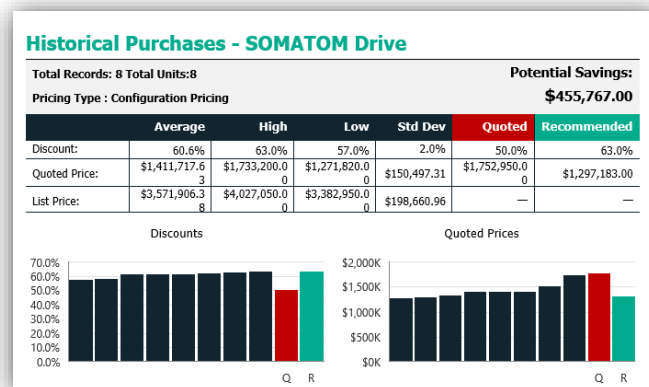

Price Benchmarking

- **Proposal Analysis** – Reviews a supplier’s quotation highlighting potential cost savings, discount histories, user experience reports, general terms and conditions, and identifies specific points to negotiate.
- **Service Contract Analysis** – Reviews the service contract to ensure cost-effective and optimum support. This analysis highlights potential cost savings, discount histories, user experience reports, review of general terms and conditions, and specific points to negotiate.
- **Reagent Contract Analysis** – Provides a review of a supplier’s quotation for the purchase of clinical laboratory equipment that highlights cost savings, discount histories, user experience

reports, review of general terms and conditions, and specific points to negotiate for outright purchases and reagent rental agreements.

- **Fair Market Value Analysis** – Places a value on used equipment and highlights marketplace value, user experience ratings, and information from our PricePaid database to better help your facility negotiate trade-in values or the sale of existing equipment.

Comparative Analyses

- **Market Intelligence Reports** – A technology snapshot of the market with a comparative analysis of key features to help guide your capital equipment purchasing decisions. Includes popular models/vendors, key considerations, KPIs, average list price vs quoted price, equipment and service costs as well as estimated cost of ownership.
- **Custom Comparative Analyses** - A detailed comparative analysis that looks at your facility's specific needs and incorporates your vendor proposals for a specific technology. Interviews with key stakeholders are performed and the report provides a recommendation as to which system is best suited for your situation. It includes a decision analysis matrix, a side-by-side return on investment (ROI) analysis and Capital Guide annual interest data.
- **Capital Budget Review** – Submit your capital budget for a comprehensive review and assessment of your annual budget. Our skilled Analysts will normalize your capital wish list and provide you back accurate prices paid with recommended makes/models per technology category along with various other customizations.

Exclusive Research Tools

- **Device Evaluation Online** – ECRI is the only healthcare company with an on-site research lab that conducts rigorous, independent testing of the latest healthcare technologies. Access unbiased medical product test results, product ratings, device safety alerts, free consultations, and exclusive webinars. Get in-depth evaluations and comparative ratings on healthcare products and expert guidance on hot technology topics to make more informed, cost-effective purchasing decisions.
- **International Vendor Guide** – Make quicker device selections and move health technology purchases forward by connecting to thousands of manufacturers, suppliers, and service companies worldwide with the largest online database of medical equipment supplier information.

Ratings: Large-Volume Infusion Pumps

Give the device names below to view our complete findings for each model. (Note that the presentation of our findings, including how we categorize our judgments, has been reformatted since some of these product Evaluations were published; this table reflects our updated approach.) Products are listed alphabetically by supplier.

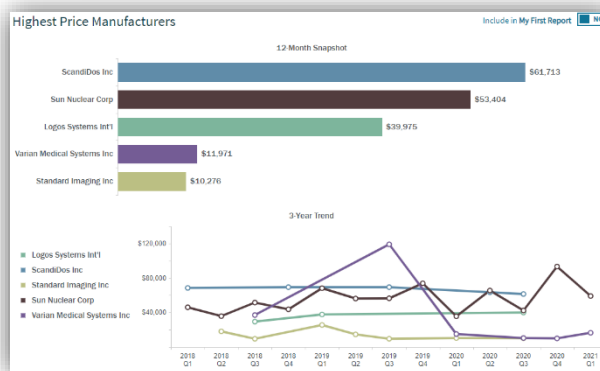

Model	Rating	Where Marketed	Performance	Safety	Workflow	Patient Experience	Interoperability	Cybersecurity	Maintenance	User Experience	Cost of Ownership (Estimated)
Models with Dose Error Reduction Systems (DERS)											
B. Braun Infusor Spectra See version 10/2020	★★★★★ (with pump integration) ★★★★★ (without pump integration)	Worldwide	Good	Good	Good	Not evaluated	Excellent (with integration) Not evaluated (without integration)	Good	Excellent	Not evaluated	\$4,800,000 (over 10 years)

Baxter Sigma Spectrum See version 10/2020	★★★★★ (with pump integration) ★★★★★ (without pump integration)	Canada, Puerto Rico, U.S.	Fair	Good	Excellent	Not evaluated	Fair (with integration) Not evaluated (without integration)	Not evaluated	Fair	Not evaluated	No details available \$4,800,000 (without integration, over 10 years)
Baxter Spectrum 10 See version 4/2020	★★★★★ (with pump integration) ★★★★★ (without pump integration)	Canada, Puerto Rico, U.S.	Good	Excellent	Good	Not evaluated	Good (with pump integration) Not evaluated (without integration)	Good	Good	Not evaluated	\$4,800,000 (without integration, over 10 years)

ECRI's exclusive Vendor Guide, contains supplier listings for nearly *12,000 product categories*, as well as contact information and hyperlinks for more than *22,400 medical equipment manufacturers and distributors worldwide* making it the most comprehensive, continually updated database.

- **Device Comparison Guide** – The world's largest database of comparative medical equipment, providing device descriptions and specifications, as well as discussions of the operational importance, clinical applications, projected costs, and value of specific technologies. Charts are customizable, so you can select, view, and print findings only on the models you're interested in.
- **Capital Market Analytics** – Real-time pricing information for thousands of model-specific devices. You will also find configuration information and benchmarks, market share, and most popular models in a device category.
- **Capital Budget Tool** – Build your capital budget online using the Market Analytics catalog. You can also use this resource for smaller scale projects like equipment lists, renovation and construction projects.

Patient Safety Resources

- **Alerts database** – The world's most comprehensive international database of recalls, hazards, product safety alerts, and reported problems provides critical safety information e-mailed weekly to minimize the chance of a missed alert. ECRI regularly investigates, reports, and frequently corrects the information provided by third parties, saving you time and money while helping you improve the quality of patient care. You will also receive exclusive reports and life-saving recommendations from ECRI's independent hazard investigations based on problem reports submitted to ECRI by thousands of hospitals worldwide.

Supply Guide

Lower expenditures on consumables & PPIs with more informed, data-driven decisions

Supply Guide, ECRI's medical supply cost benchmarking system, offers the industry's largest and most comprehensive database of medical-surgical supplies, implants, instruments, pharmaceuticals, industrial and office supplies. The database is comprised of pricing contributed by over 2,400 medical facilities within the United States and is representative of the size, type, and scope of all facilities and of all group purchasing organizations.

Supply Guide automatically benchmarks your specific prices against those paid elsewhere in the nation, enabling you to immediately pinpoint specific products and vendors that give you the best cost-saving opportunities.

Highlights

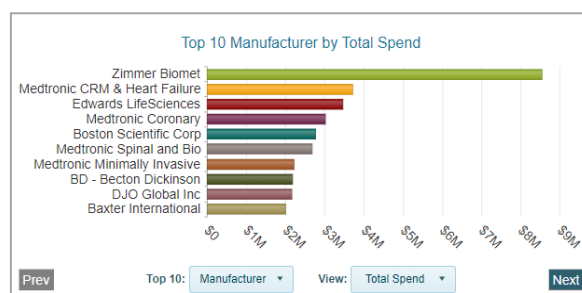

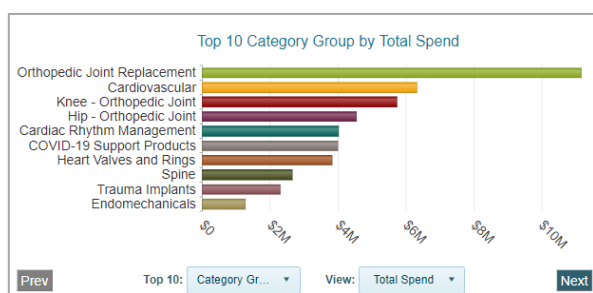

- ROI savings: 4%-14% range of your facilities overall supplies expenditure
- \$43 billion in spend represented from over 2,400 facilities contributing data
- 2.3 million unique items
- 8,800 suppliers with over 3,650 categories
- Cross representation of all GPOs, facility/hospital types and regions

Online Database

ECRI's Supply Guide database gives you a tremendous negotiating advantage by letting you automatically compare your hospital's actual costs against the low, 25th percentile, median, 75th percentile, and high prices paid in your region or across the nation.

Spend Analysis

View spend analysis (your facility and national view) by top category/group, department, facility, item, manufacturer, and vendor.

Compare Your Market Share with Peer Hospitals

Quickly visualize your hospital or health system's market share for a product category and compare it to other hospitals or systems. Inform your purchasing decisions and gain greater leverage in your vendor negotiations.

Custom Reports

Membership includes an unlimited number of custom reports and training.

- **Proposal Analysis** – Request a comparison of your proposed pricing – Have your proposed pricing benchmarked within 48 business hours. Each quotation analysis includes benchmarks against the Supply Guide national low, 25th percentile, median, 75th percentile, and high prices for each item along with identified potential savings.
- **Spend Analysis** – Provides an overview of spend, savings and standardization opportunities – These analyses dive deeper, analyzing purchases by department/clinical line and/or by product category.
- **Price Parity Analysis** – Identifies situations where different prices have been reported by your organization for the same vendor, catalog number, and unit of measure combination.
- **Data Standardization Report** – Provides members insight into the normalization process applied to their data. This report will show standardized vendor and manufacturer names, catalog numbers, descriptions, any excluded data, and mappings to ECRI's Device Nomenclature where available.
- **Technology Analysis** – Compare multiple products feature-by-feature based on our evaluations and in-house lab testing, and receive a recommendation of which product to purchase.

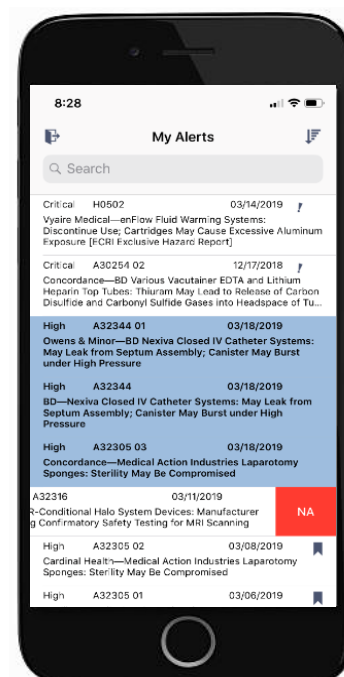

Alerts Workflow

Increase your recall compliance rates to 95% or more

Improve patient safety and outcomes by tracking recall activity in real-time with ECRI Alerts Workflow, a comprehensive alert and recall management solution that helps ensure the removal of harmful products before they reach the patient. As one of the leading healthcare recall management solutions with over 30,000 unique users world-wide, Alerts Workflow can be customized to your health systems' needs and integrated with your CMMS systems to help expedite the remediation and/or removal of potentially harmful products.

Membership Highlights:

-
- **Timely Access to Alerts** – Mitigate risk with timely notifications, often preceding FDA recall notices, for Implants and Class I Recalls.
- **Coordinator Dashboard** – Enable more efficient recall management with a Coordinator Dashboard for drill-down visibility into alert status by priority, average days to resolution, and compliance.
- **Escalation Feature** – Configure notification timelines for escalating to key stakeholders when alerts remain unresolved.
- **Medical Technology Cybersecurity Alerts** – Leverage ECRI cybersecurity engineers/analysts to keep you informed of cybersecurity issues affecting your medical technology.
- **Customizable Reporting Tools** – Generate a report on your recall compliance for the next accreditation survey or regulatory audit and access reports at any time to monitor status across 50 user categories.
- **Exclusive ECRI Content** – Access alerts and guidance from ECRI's world-renowned adverse events investigations and our exclusive Problem Reporting Network, covering: medical assets, consumables and supplies, vaccines, contrast media and reagents. Extended coverage of pharmaceuticals, blood, and food alerts is also available.
- **Dedicated Recall Advisor** – Lean on your dedicated recall advisor for help with everything from training and implementation to custom reporting, policy review, and development.

Alerts Automatch for Capital and Supplies

Save time and effort associated with medical technology management by matching recall and hazard alerts to purchased inventory

Alerts Automatch, an add-on module to Alerts Workflow, automatically matches recall and hazard alerts to impacted inventory for priority handling, reducing the time that it takes for staff to locate devices that require corrective action.

ECRI's propriety data standardization and normalization services will validate and clean your equipment asset inventories and supply purchase history to ensure more effective and accurate matching to protect your patients and staff.

Membership benefits:

- **Reduction in Time and Resource Effort** – Automatically flag safety alerts that relate to purchased devices
- **Increased Productivity and Cost Savings** – Eliminate the need for scrubbing of asset databases and time-consuming manual look-ups, reducing recall management time by up to 90%
- **Enhanced Patient Safety** – Increase the reliability of your alerts management and reduce the potential for missed or delayed corrective action on medical supplies and equipment
- **More Accurate Matches** – Leverage extensive ECRI catalog resources and subject matter experts to address inconsistent data entry and updates due to industry mergers and acquisitions
- **Improved Data Governance** – Create a consistent view and glossary of asset data that ensures data quality, accuracy, completeness, and consistency
- **Enhanced HTM Operations** – Enhance device servicing and maintenance to reduce potential for delayed maintenance/repair and assist with end of life replacement of medical equipment.

Assurance to make healthcare safer

ECRI solutions empower healthcare leaders to make the best decisions to deliver safe, effective, and efficient care

As an independent, nonprofit organization, ECRI serves as a trusted authority on healthcare practices and products that improve the safety, quality, and cost-effectiveness of patient care. We are focused on improving healthcare and outcomes through three core pillars of service: enhancing the safety and quality of patient care, advancing evidence-based decision making, and reducing the costs of technology and technology decision making.

The following are several ECRI strengths that distinguish us from our competitors:

Objective, non-profit organization with a strict conflict of interest policy –

ECRI accepts no gifts or grants from the medical device and pharmaceutical industries and ECRI and its employees are prohibited from consulting for these industries. Each year, every employee's income tax return is reviewed to ensure that no employee owns stock in a medical device manufacturer, pharmaceutical or biotechnology company, which ensures that our reputation for independent, objective recommendations is unmatched.

Patient safety – Our patient safety team drives improvements in safety working with healthcare delivery organizations and stakeholders across all settings of care. Named a Patient Safety Organization (PSO) by the U.S. Department of Health and Human Services, ECRI has collected more than 4 million serious patient safety events and near-miss reports from over 1,800 healthcare providers around the country. We study the events, determine causes, and research best practices. This information provides a rich evidence base that generates real-world solutions to complex safety problems.

Evidence-based Medicine – ECRI, designated an Evidence-based Practice Center (EPC) with Penn Medicine, conducts research reviews for the Effective Health Care (EHC) Program. As one of 9 EPCs, we provide a variety of services, including evidence reports and assessments on medical technologies and health policy issues. Our team of experts provides trusted guidance and consulting on new and emerging medical technologies, procedures, genetic tests, and clinical practice guidelines. We track technologies and services still in development and forecast what may impact healthcare in the future.

Technology Decision Support – As the nation's only independent medical device testing organization, ECRI conducts hands-on, rigorous testing and evaluation of devices that informs real-world technology decision making across all care settings. No other private sector organization in North America assumes this responsibility or provides this level of information and assurance.

Membership Pricing

The annual fees for Mount Sinai Health will be as follows:

Capital Guide \$143,319.00

Supply Guide \$44,644.00

Alerts Workflow Add-On Options and Upgrades:

Alerts Workflow, Alerts Automatch for Supplies/Alerts Automatch for Equipment* Data Standardization for Supplies and Equipment Data Standardization: \$75,878.00

Should Member choose to become a Supply Guide Member, the above fee would be adjusted to \$58,598.00 (No Supplies Data Standardization fee would apply)Savings of \$17,280.00

Your membership will begin upon receipt of a signed agreement**. The annual membership fee includes all of the above services. There is no initiation fee.

This price will be valid not more than 45 days from the date of this letter.

Proposal is based on the following locations:

Facility Name	Facility Address
Mount Sinai South Nassau	One Healthy Way Oceanside NY 11572-1500 USA
Mount Sinai Hospital	One Gustave L Levy Pl 1468 Madison Ave New York NY 10029 USA
Mount Sinai Morningside	1111 Amsterdam Ave New York NY 10025-1716 USA
Kravis Childrens Hospital at Mount Sinai	1184 Fifth Ave New York NY 10029 USA
Mount Sinai Queens	2510 30th Ave Astoria NY 11102-2495 USA
Mount Sinai Queens	2510 30th Ave Astoria NY 11102-2495 USA
Mount Sinai West	1000 10Th Ave New York NY 10019-1192 USA
Mount Sinai Beth Israel Brooklyn	3201 Kings Hwy Brooklyn NY 11234-2698 USA

***** Agreement will be sent via ECRI's DocuSign for execution, upon receiving the fully executed Agreement, membership access will be initiated.***
