

PHARMACEUTICAL RECALL MANAGEMENT

What would you gain from seeing recalls ~27 days sooner?

Inmar Intelligence, a leader in the pharmaceutical reverse distribution industry, offers a best-in-class solution for managing and removing recalled products, often with no bottom-line expense to the customer.

Through comprehensive distribution and organization of pharmaceutical alerts and recalls, our **OneRecall®** solution helps improve patient safety, reduce legal risk, simplify regulatory reporting, and enhance your recall management process.

OneRecall is the only recall management system that handles impacted products all the way through final disposition and credit attainment, increasing workflow reliability and decreasing risk.

Access Comprehensive Recall and Product Alert Information

Simplify and Expedite Distribution of Alerts and Recalls

Gain Detailed Tracking, Escalation, and Oversight of Recalls

Achieve Prompt Removal of all Recalled Products and Proper Final Disposition

Recoup Credit from the Manufacturer
