Settings manage preferences, safety officers and department setups

Tracked Recalls action and manage recalls already initiated and assigned

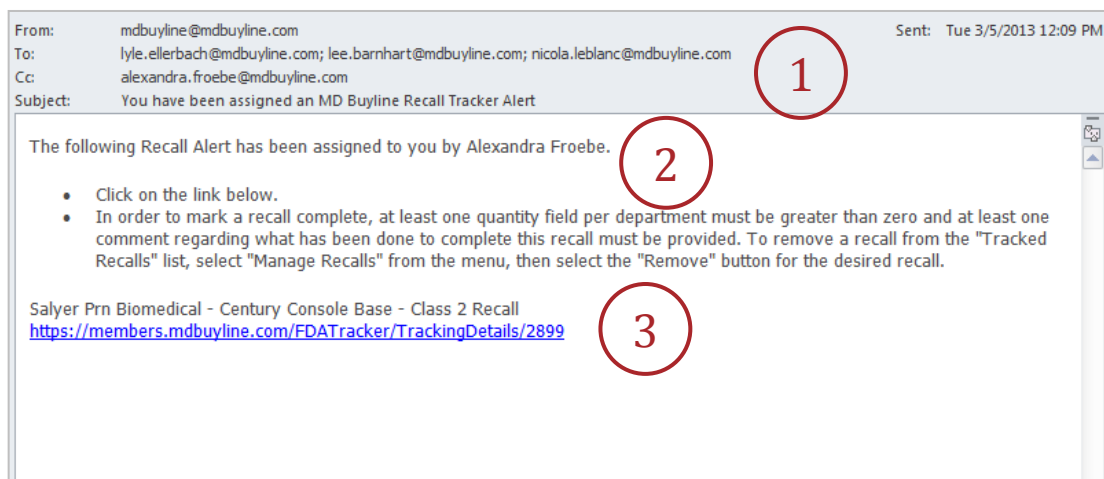

Recalls identify and track recalls directly from the FDA

Custom Recalls add and track recalls sent directly to your facility, could be voluntary or an alert

Drafts repository of drafts previously created in custom recalls

SmartMatch Alerts recalls that have been linked to your facilities purchase history

Recall Assignment Email Cheat Sheet

1

The email shows who at your facility (including yourself) has been assigned as a resource to take action and document a specific recall.

2

The beginning part of the email indicates which Recall Manager initiated the tracking of this recall and assigned you as a resource.

3

The end of the email identifies the recall which needs action and the class designation of that recall by the FDA. The link provided allows you to quickly launch the MD Buyline Recall Tracker application and open the Tracking Details page for this recall.
